

Aiswarya K S

Cybersecurity Engineer - Intern

+916235152940 | ksaiswarya10@gmail.com | linkedin.com/in/aiswarya-k-s
github.com/ksaiswarya10

Professional Summary

Cybersecurity Engineer Intern with hands-on experience securing enterprise environments from configuring SonicWall and Fortinet firewalls to investigating phishing and spoofing campaigns via Check Point Harmony. Proficient in SIEM monitoring (Wazuh), DLP analysis, and vulnerability assessment. Demonstrated ability to build security tools independently, including a machine-learning phishing detection system deployed in production. Seeking a SOC Analyst or Cybersecurity Analyst role where I can apply both my defensive security skills and development background.

Technical Skills

Security Tools:	Nmap, Wireshark, Burp Suite, OWASP ZAP, Kali Linux, Wazuh
Firewalls & Email Security:	SonicWall, Fortinet, Check Point Harmony Email & Collaboration
Networking:	TCP/IP, DNS, HTTP/HTTPS, SSL/TLS, OSI Model, VPN, NAT
Security Concepts:	Phishing, DDoS, MITM, SQL Injection, XSS, CSRF, Brute Force, OWASP Top 10, DMARC/DKIM
Compliance:	PCI DSS, DLP, Security Awareness
Development:	Python, Java, SQL, Bash, REST APIs, Flask, Spring Boot, OOP

Experience

Cybersecurity Engineer – Intern *TeknogenX Pvt Ltd*

Jan 2026 – Present
Kochi, Kerala

- Monitored and triaged security events across Check Point Harmony Email & Collaboration, identifying phishing, spoofing, and malicious attachment campaigns through real-time alert analysis.
- Investigated email security incidents using DMARC and DKIM authentication frameworks, reducing false-negative rate for spoofed senders.
- Configured firewall rules, NAT policies, and access controls on SonicWall and Fortinet platforms; assisted in VPN setup for secure remote communication.
- Analyzed Data Loss Prevention (DLP) alerts to prevent unauthorized exfiltration of sensitive data.
- Conducted vulnerability assessments to improve overall security posture and contributed to PCI DSS compliance reporting.
- Delivered security awareness sessions explaining live threat scenarios and practical mitigation strategies to non-technical staff.

Java Full Stack Developer – Intern *Kodnest*

Sept 2024 – June 2025
Bengaluru, Karnataka

- Built and deployed web applications using Java, Spring Boot, and MySQL; designed and consumed REST APIs with full CRUD functionality.
- Developed responsive front-end interfaces and applied secure coding practices, reinforcing application-layer security awareness.

Projects

Mini SOC Lab

github.com/ksaiswarya10/Mini-SOC-Lab

- Designed and operated a personal SOC environment to simulate, detect, and respond to real-world attack scenarios.
- Simulated SSH brute-force attacks, generated 100+ failed authentication events, and detected them in real time via Wazuh SIEM dashboard and Linux log analysis.
- Applied UFW firewall rules to block attacker IPs; re-simulated attacks to verify mitigation effectiveness.
- Practiced end-to-end SOC workflow: detection → log correlation → investigation → incident response.

Phishing Detection Web Application

github.com/ksaiswarya10/phishing-detection

- Developed a production-deployed web app that classifies URLs as legitimate or malicious using a Random Forest ML model trained on phishing datasets.
- Engineered features including URL length, IP presence, domain age (WHOIS lookup), and suspicious pattern matching to achieve high detection accuracy.
- Built an interactive Flask interface for real-time URL analysis; deployed live on Railway with a public-facing URL.
- **Tech Stack:** Python, Flask, Scikit-learn, Pandas, HTML/CSS.

Sarcasm Detection using BERT and GCN

- Built a deep learning model combining BERT contextual embeddings with Graph Convolutional Networks to detect sarcasm in user reviews.
- Improved sentiment analysis accuracy by capturing subtle linguistic and relational patterns in text data.

Education

Bachelor of Technology in Computer Science

Eranad Knowledge City Technical Campus

2020 – 2024

Manjeri, Kerala

- CGPA: 7.68 / 10

Certifications

- Harmony Email and Collaboration Specialist – *Check Point Software Technologies*
- Harmony Endpoint and Browse-Tech Specialist – *Check Point Software Technologies*
- Firewall Configuration Workshop – *SonicWall*
- Cybersecurity Essentials – *Cisco*
- API Penetration Testing – *APIsec University*
